

RightNow CRM 7.5 Workstation Specifications

To operate RightNow CRM, workstations must meet the requirements included in this document. These requirements reflect the resources required by RightNow CRM, and do not account for additional resources required by operating systems and other applications running on the workstation.

Note RightNow CRM 7.5 includes RightNow Service 7.5.1 through 7.5.3, RightNow Marketing 7.5.1 through 7.5.3, and RightNow Sales 7.5.1 through 7.5.3.

Hardware configuration

The minimum hardware requirements for the staff member workstations are listed in Table 1.

Table 1: Workstation Hardware Requirements

Workstation Type	Memory	CPU	Hard Disk
Agent	Minimum: 512 MB Recommended: 1 GB	Minimum: 700 MHz Recommended: 1.5 GHz or greater	<ul style="list-style-type: none"> • 50 MB free with 512 MB virtual memory • 500 MB free for disconnected access*

* Required free hard disk space will vary depending on database size and file attachments.

Workstation operating systems

RightNow staff member and administrator functions are supported on workstations running either Windows 2000 Professional (SP 4) or XP Professional (SP 2) operating systems. All other workstation operating systems are not supported for this release.

Workstation display settings

The following display settings are required for staff member and administrator workstations:

- Minimum screen area: 1024 by 768 pixels
- Font size: Small fonts or normal size (96 dpi)

.NET Framework

RightNow staff and administrator workstations require and must support .NET Framework Version 1.1 (SP 1). If a staff or administrator workstation does not have .NET Framework installed, the component manager will prompt you to download and install it.

Web browsers

RightNow CRM requires the web browser versions listed in Table 2 (PC) and Table 3 (Macintosh). Using versions of web browsers that are not listed in this table will result in improper functioning of RightNow CRM. In addition, the browser text size must be set to Normal.

Networks

RightNow CRM requires a high-speed Internet connection that meets minimum bandwidth and latency requirements. For more information on Internet connection requirements, refer to Answer ID 2302 on the RightNow support site at:

<http://rightnow.custhelp.com>

Firewalls, proxy servers, and content filters can affect the performance of RightNow CRM. If your site is hosted by RightNow Technologies, the following configuration is required.

- Firewalls must allow all traffic from your custhelp.com subdomains (*.custhelp.com).
- Proxy servers and caching firewalls must have an exclusion rule to prevent the caching of RightNow components and files.
- Content filters must allow traffic from your custhelp.com subdomains (*.custhelp.com).
- Personal firewalls must allow applications to access the Internet.
- Proxy servers cannot require explicit authentication of RightNow components and files.

Security

Viruses, adware, and spyware can affect the performance of your workstation and RightNow products. We recommend that workstations have a firewall, anti-virus software, and spyware-and adware-detection software.

Additional requirements

If you are using RightNow Live or RightNow Sales, refer to Table 4 for software and hardware requirements. These requirements are in addition to the workstation recommendations listed in Table 1 and Table 2.

Table 4: Additional Requirements
