

RightNow 8.0 Workstation Specifications

To maximize the performance of RightNow 8.0 for staff members and end-users, we recommend the following workstation hardware configurations, operating systems, and web browsers. Also listed are additional requirements for RightNow Live, RightNow Sales, and RightNow Computer Telephony Integration (CTI).

Note RightNow 8.0 includes RightNow Service 8.0, RightNow Marketing 8.0, RightNow Sales 8.0, and RightNow Feedback 8.0.

Hardware configuration

Important The minimum hardware requirements for the staff member workstation listed in Table 1 are suitable for workstations running only RightNow applications. The minimum requirements do not include the additional memory or disk space required for operating system swap space or other applications running on the workstation. If other applications are going to be running on workstations with RightNow applications, we strongly encourage equipping workstations with the recommended hardware, especially memory.

Table 1: Workstation Hardware Requirements

Workstation Type	Memory	CPU	Hard Disk
Agent	Minimum: 512 MB Recommended: 1 GB	Minimum: 700 MHz Recommended: 1.5 GHz or greater	<ul style="list-style-type: none"> • 50 MB free with 512 MB virtual memory • 500 MB free for disconnected access*
Administrator	Minimum: 512 MB Recommended: 1 GB	1.5 GHz	<ul style="list-style-type: none"> • 50 MB free with 512 MB virtual memory

Important * Required free hard disk space will vary depending on database size and file attachments.

Workstation operating systems

RightNow staff member and administrator functions are supported on workstations running Windows 2000 Professional (SP 4), Windows XP Professional (SP 2), or Windows 2003 Server operating systems. All other workstation operating systems are not supported for this release.

Note If you are running Windows 2003 Server, Enhanced Security Mode cannot be enabled in Internet Explorer.

Workstation display settings

The following display settings are required for staff member and administrator workstations:

- Minimum screen area: 1024 by 768 pixels
- Font size: Small fonts or normal size (96 dpi)

.NET Framework

RightNow staff and administrator workstations require and must support .NET Framework Version 2.0. If a staff or administrator workstation does not have .NET Framework installed, the component manager will prompt you to download and install it.

Web browsers

RightNow 8.0 requires the web browser versions listed in Table 2 (PC) and Table 3 (Macintosh OS X). Using versions of web browsers that are not listed in this table will result in improper functioning of RightNow. In addition, the browser text size must be set to Normal.

Table 2: Web Browser Version Requirements for PCs

User	Internet Explorer	Netscape	Firefox
Staff Member	6.0 (SP 1 or newer) or 7.0	NA	NA
End-User	5.5 to 7.0	8.1	1.5
RightNow Live Agent	6.0 (SP 1 or newer) or 7.0	NA	NA

Table 2: Web Browser Version Requirements for PCs (Continued)

User	Internet Explorer	Netscape	Firefox
RightNow Live End-User	5.5 to 7.0	8.1	1.5
Co-browsing Agent	6.0 (SP 1 or newer) or 7.0	NA	NA
Co-browsing End-User	5.5 to 7.0	NA	NA
Section 508 Accessibility	6.0 (SP 1 or newer)	NA	1.5

Table 3: Web Browser Version Requirements for Macintosh OS X

User	Netscape	Safari	Firefox
Staff member	NA	NA	NA
End-User	8.1	2.0	1.5
RightNow Live Agent	NA	NA	NA
RightNow Live End-User	8.1	2.0	NA
Co-browsing Agent	NA	NA	NA
Co-browsing End-User	NA	NA	NA
Section 508 Accessibility	NA	2.0	1.5

Networks

RightNow 8.0 requires a high-speed Internet connection that meets minimum bandwidth and latency requirements. For more information on Internet connection requirements, refer to Answer ID 2364 on the RightNow support site at:

<http://rightnow.custhelp.com>

Firewalls, proxy servers, and content filters can affect the performance of RightNow. If your site is hosted by RightNow Technologies, the following configuration is required.

- Firewalls must allow all traffic from your custhelp.com subdomains (*.custhelp.com).
- Proxy servers and caching firewalls must have an exclusion rule to prevent the caching of RightNow components and files.
- If you are using a proxy server, you must use a non-authenticated connection to install RightNow. If you are using an authenticated connection, you will need to install the client on staff workstations using the CD installer.
- Content filters must allow traffic from your custhelp.com subdomains (*.custhelp.com).
- Personal firewalls must allow applications to access the Internet.
- Proxy servers cannot require explicit authentication of RightNow components and files.

Security

Viruses, adware, and spyware can affect the performance of your workstation and RightNow products. We recommend that workstations have a firewall, anti-virus software, and spyware-and adware-detection software.

Additional requirements

If you are using RightNow Live or RightNow Sales, refer to Table 4 for software and hardware requirements. These requirements are in addition to the workstation recommendations listed in Table 1 and Table 2.

Table 4: Additional Requirements

User	Additional requirements
RightNow Live Agent	Java browser plug in Version 1.5.0_02
Sales Quotes Staff Member	Microsoft Word 2000 or newer (merging quotes only)

Table 4: Additional Requirements (Continued)

User	Additional requirements
Sales Disconnected Access Staff Member	<ul style="list-style-type: none"> • Apache 2.0 • Minimum of 500 MB free hard disk space. • Minimum 1.5 GHz processor • High-speed Internet connection for synchronizing <p>Note: If a staff member has not installed Apache 2.0 for Disconnected Access, it will be installed automatically. If MS-SQL Desktop Edition 7.x or lower is already installed on the workstation, you will need to upgrade or remove the instance before installing RightNow Sales Disconnected Access.</p>
